This is a **static text** element containing styled text. **Styled text** elements are introduced by setting the *isStyledText* boolean attribute available for the **textElement** tag to *true* and by formatting the text content using nested **style** tags and simple HTML tags.

This is a text field element that contains styled text displaying the text-only version of the ^JasperReports logo.

Here is the list with the attributes supported by the **style** tag used to format the text content inside a styled text element:

fontName

size
isBold
isItalic
isUnderline
~~isStrikeThrough~~
pdfFontName
pdfEncoding
isPdfEmbedded
forecolor
backcolor

Here is the list with the supported HTML tags :

<font size="12">
<font color="red">
<font face="Comic Sans MS">
bold
italic
underlined
an empty line follows(<br/>):

A bulleted list:

• item 1

ampersand & less < greater > quote "

ampersand & less < greater > quote "
